Use layers to edit images Photoshop Layers are the fundamental building block used in designing, editing and creating images. Layers allow you to work on various parts of the image separately. Each layer may be moved, removed or scaled, and each layer can contain a variety of objects and functions. You can manipulate each layer and the overall image by editing individual layers and layers compositions. If you edit an object in one layer, it will only affect the layer it is contained in. A Layer is the core of every image, and it's what holds the whole design together. It contains a ton of features. For instance, you could add a drop shadow or use a Layer to change the overall contrast of an image. Just like you can add a layer to one object, you can add a layer to a path. A path is a shape you create. With a layer, you can place various objects and objects such as a drop shadow can be added to one layer. This layer is then visible in the entire image. North Korea's state-run Rodong Sinmun on Wednesday denounced U.S. Vice President Mike Pence as "vicious" after he called the "human scum" who killed 58 people in a mass shooting. Why it matters: Pence said that he and President Trump were "dismayed" to learn of "this numbing evil" following the slaughter of at least 22 people in El Paso, Texas, before another death at a Walmart. The U.S. holds North Korea responsible for the horrific, protracted starvation that's plagued the country for decades. "[New York] Post" via "Here" via Deadspin The only thing you need to know about Kurt Angle and his post-WrestleMania engagement to former Miss Universe Gina Hunegs is that he reportedly liked her before they got together. The star, who is an ordained minister, proposed to the beautiful brunette earlier this year. After rumors of a possible marriage surfaced, Angle's family weighed in on the matter. Angle's brother-in-law, Jon Kon Torgersen, took to Facebook on Sunday and mocked anyone who had been asking about the wedding or the couple's relationship. "Soooo. Kurt and Gina are engaged. Here's what I've heard: Kurt's family was told that Gina was not ready to get married. So Kurt's family knows Gina was involved with Kurt before he proposed to her. Kurt's family was also told that Gina planned to get an STD before they could marry," he wrote. "I'm not going to rant and rave anymore about the TMZ or anyone else who has written or has said negative things about Kurt and Gina. I don't care if she had 10 boyfriends, or a husband, that doesn't mean anything. Kurt and Gina love each other. She's a beautiful person inside and out," he wrote. Before "Celebrity Big Brother," Hunegs was a soap opera star in Greece and the Philippines. She was crowned the winner of "Miss Universe" in 1999, and her death was widely publicized last year. Q: Declaring a type-safe collection? I am currently putting together a small script for my own use. But I came across a small bug which does not know how to solve. In this example, I am trying to find all users on a list that start with the same letter. Note that the name has to be unique and never assigned to multiple usernames at the same time. At first I thought I could just do something like `foreach($users as $u){ if(strpos($u,$letter)==0){ $found = 1; } }` However, this does not work because by the time I get to the next if statement, \$letter has changed to something else (as it's pushed out of the loop). So I tried this function `findUsernames($list,$letter){ $count = 0; $i = 0; while($i`
