Bihar will see a triangular contest for six of the seven Lok Sabha seats, where the BJP has fielded candidates for the first time and the new seat of Dhanbad and the seat of Muzaffarpur were represented by the JD(U) and the RJD respectively in the last two elections. The BJP candidate in Dhanbad, Anirudh Pratap Singh, has already joined the party in the last week and has been given a ticket from the Pataliputra constituency in West Bengal, where his brother Atul Singh was defeated by Congress' Mansukh Raman last time around. The RJD candidate in Muzaffarpur, Arvind Kumar, will field his nephew Sushil Kumar Singh from the Khagaria constituency. The BJP, in its bid to stake a strong claim in Bihar, will field Pratap Singh from Pataliputra, Manoj Pandey from Madhubani and Sushil Singh from Khagaria, who is considered close to the Rashtriya Janata Dal (RJD). The BJP has adopted a Janata Parivar (nation wide) approach for the campaign, with each of its candidates having a complete and coherent campaign strategy and presenting, for the first time, the party's own narrative, in an attempt to tap the sentiment of the people. The party will also rope in young faces to campaign in the towns and rural areas, an approach that has worked for the BJP in Uttar Pradesh. The BJP has allocated seats to veteran leaders, some in the top

[easy_install nakid] [easy_install nakid-www] [easy_install nakid-us] Welcome to nakid-www ... Nakid is often used to create static content for the website(s) mentioned in nakid-us. For example, a simple website for a restaurant could be built by making a page for each menu item and by using nakid to populate all of the page headers. As another example, a full news site could be built using nakid by first collecting the news stories and then by putting them into a nakid page. Nakid takes its name from a phrase meaning "as well as". Nakid CMS has multiple methods of populating the website's content. So if you were building a site about cars, you might use nakid to build a page about subcompact cars and then use nakid to build a page about other cars. You could also use nakid to build a page that contained news about subcompact cars and then use nakid to build a page about other cars. Nakid CMS Features: * web page and database schema migrations * comprehensive syntax highlighting * structured model relationships * full image support * semantically powerful mark-up * content specific content types * easy to use interface * comprehensive end-user feedback *
