What's New in the WWW2Image?

WWW2Image is a utility which allows you to save complete web pages as images. You only need to enter a URL into the Address box, click the Start button, and WWW2Image will capture full size web pages for you. WWW2Image can generate a thumbnail for your web page. WWW2Image can simulate screen resolution of: 1024*768, 1280*1024, 800*600. WWW2Image requires Internet Explorer 6 or higher. WWW2Image can be downloaded on SourceForge.net for free as a 4MB file. You can also get the latest version or browse the full source code of this program from WWW2Image Screenshot:Q: JQuery - My datepicker is off by one day I'm trying to add a datepicker to a form but it's one day off from what it should be (weeks off). I didn't write this code and I can't debug it at work. If I use a different date (which is valid, since it should work with any date in the current month), it selects that date, so the problem is definitely with the formatting of the date. //datepicker for default date \$(document).ready(function() { \$("#default_date").datepicker(); }); //datepicker for editing date \$(document).ready(function() { \$("#edit_date").datepicker(); }); If anyone can point me in the right direction, I'd be very grateful. Edit: I found the problem. It's because the default_date field is a hidden field and the html looks like this: I was storing the default date in the "default_date" field. This works fine. A: hmm, you might want to have a look at their documentation - it says to run \$('#datepicker').datepicker(); so I'm guessing you need to call your function at

System Requirements:

- Dual Core CPU 1GHz or faster - 1GB RAM - 5GB or more free space on the hard drive. - Mouse and keyboard (recommended). ****Mac users:**** The game may run a bit slower than on a Windows system. - Get Game Copy (for the installer. 3) Download and Install: - Guardian Pre-Alpha build, 1.1.1 - Click the link below
