It runs about from Offa's Dyke, close to the village of Offa's Dyke, to the Dee Estuary in the English county of Shropshire. It was created by the Offa's Dyke Trust in the 1970s to mark Offa's Dyke as a World Heritage Site. Construction The path of the dyke is formed by a series of raised embankments and earthworks, and is about wide, running for across the Weald from Shrewsbury to the River Dee. A parallel path, known as 'Offa's Way', runs about to the south. There is evidence of dyke-building around this time in the region, including the burials of eight individuals with elaborate cremation burials at Ham Hill in Staffordshire. The original dyke was probably a Celtic earthwork, as was indicated in the Anglo-Saxon Chronicle by the fact that the text was broken off in 789 AD, which was a major event that occurred during Offa's reign. Offa was buried at Offa's Dyke
