Like most CAD programs, it is used for creating various types of drawings. These drawings may be from the real world like plans, engineering schematics, and architectural blueprints, or they may be hypothetical for visualization and planning purposes. A similar program is AutoCAD LT, which is optimized for smaller drawings. In 2012, AutoCAD was used for drawing the first ever 3D printed human brain. Using the 3D printing technology known as selective laser sintering, researchers at Carnegie Mellon University were able to create a living, bio-engineered human brain model for about US$7000. We had a sunrise service at our local park, ran errands and met a friend for lunch and so much more. This was my first time at the local park. I was a little sad because we did not see my favorite bluebird there. We will be seeing the local bluebird and a great number of other species. Today we saw warblers, mourning doves, field sparrows and we saw a gorgeous red eyed vireo and a beautiful Rose-breasted Grosbe
