Last update and review: January 29, 2018 -December 20, 2017 Would you recommend this to a friend? YES By Armgod on December 20, 2017 The product itself is not what it seems. I bought this game just for the anime art with a single gfx of a high quality. This game is a collection of the LARP game Guild of Heroes. The price is too high (I can't get this game for 100 dollars) and the product is weak. The anime art is not high quality. It looks like the thumbnail. It looks rushed, had a little time and just throw anything. You can never win a LARP game with such a low quality art. The game itself is a dice-lite RPG (just like another LARP game Guild of Heroes), and you can't lose any of the character's time if you have not enough rousing, because you win by using a bit of this or that magic, or by collecting X-amount of a specific item. The story is not good, and the gameplay is too simple. You can't use the anime art and characters to your advantage in the game. By thewikitor on December 20, 2017 The gameplay is simple and consists of passing rolls to see who is the top of the list. The stats aren't very detailed but you can make it strong through gear and actions. The editor is very usable and gets you to make your own maps and fight your friends. By thewikitor on December 20, 2017 I would recommend this game if you're looking for an easy to use RPG for your casual battles. While the production quality isn't great, the content is very good. By GenHipster on December 20, 2017 Product was great. Gave a +10 rating. By Bamms979 on December 20, 2017 Super easy and beautiful! Best RPG maker I've used to date! By Nakadei on December 20, 2017 It's a bit difficult to catch the quality. But, it's OK. I think the game is too easy. It's not that difficult for veteran-RPG-hackers. By Stios on December 20, 2017 I'm really pleased with this. Even though it's simple it is quite fun to play. I would recommend this to others looking bff6bb2d33

Q: Set Window dimensions to fit parent (just like PhotoView in

Android) I am trying to get the same UI as PhotoView in Android when it is dragged into the window. Is this possible? I tried `LinearLayout.LayoutParams.MatchParent` but this does not allow me to have a button inside the window, but it will move the window up/down when the user drags it. The screenshot from PhotoView shows what I am trying to achieve: Thanks in advance!

A: Can you give `LayoutParams.MatchParent` this `LinearLayout`, a `BackgroundColor` to the entire view, and a `LayoutParams.RelativeLayout` to the `EditText`? Does the `EditText` have a linear layout inside it? If it doesn't, then try to include it. Can you give me an example layout file for this? Maybe I can spot what you have already.
